

Vladyslav Hushpet

Junior QA Engineer (GameDev)

Kyiv, Ukraine | vladgushpet@gmail.com | +380 68 799 8834

ABOUT ME

I am a Junior QA Engineer with a passion for game development and a strong desire to join a great team to work on exciting projects. I have a solid foundation in manual testing, proficiency in Jira, test documentation, and AI tools usage. In my free time, I study Unreal Engine, 3D modeling in Blender, create mods, and work on game localization.

COMMUNITY & PLAYTEST EXPERIENCE

QA Game Tester (Community Beta Testing)

Various Indie Studios | December 2025 - February 2026

- Participation in indie games beta testing.
- Execution of functional, gameplay, and UI/UX testing.
- Writing structured bug reports.

QA Game Tester (Closed Playtest)

Ocean Keeper Co-op | September 2025

- Execution of Exploratory Testing to identify unpredictable defects.
- Performing Confirmation Testing and Regression Testing after developer bug fixes.
- Providing detailed feedback on gameplay mechanics and balance to enhance Player Experience.
- Creating detailed bug reports with clear reproduction steps and visual evidence (screenshots/video).

PROJECTS & MODS

QA Flash Cards (In Development)

An interactive application for learning and reviewing testing theory, SDLC/STLC, types of testing, and test documentation.

Twitch City (In Development)

Multilingual (UA/EN) SaaS service for Twitch streamers. Premium UI/UX design, integration, and widget configuration for broadcasts.

WhiteWhisper Localization

Full official Ukrainian localization of the game. Using Python to automate text and engine tag replacements.
